

Approach: One to one

Year: 4 & 8

Focus: Deciding which graph shows the information most clearly

Resources: 2 graphs – A, B

Questions / instructions:

Give student graphs.

These graphs both show the same information about children's favourite junk foods.

- What percentage of children said biscuits were their favourite junk food?
15% (15)
14% or 16% (14 or 16)
- Which graph did you use to work that out, graph A or graph B?
A
B
- Why did you use that graph?
Bar:
explanation showed good understanding of bar graph (e.g. has numbers)
preferred that type of graph/was easier/seen that type before
both above

	% response 2007 ('03)	
	year 4	year 8
1.	51 (59)	86 (81)
2.	88 (92)	93 (93)
3.	19 (21)	14 (11)
	13 (14)	20 (20)

- What junk food did half the children say was their favourite junk food?
ice cream
 - Which graph did you use to work that out, graph A or graph B?
B
A
 - Why did you use that graph?
easy to see half (pie graph)
50% was half, easy to see (bar graph)
liked that type of graph/was easier/had seen that type before
it was the first one student looked at and gave answer
- | | % response 2007 ('03) | |
|---------------------|-----------------------|---------|
| | year 4 | year 8 |
| 4. | 52 (61) | 86 (85) |
| 5. | 51 (58) | 71 (61) |
| | 39 (31) | 18 (23) |
| 6. | 46 (51) | 75 (70) |
| | 17 (8) | 17 (21) |
| | 23 (16) | 16 (17) |
| | 2 (0) | 4 (2) |
| Total score: | 10-11 | 22 (31) |
| | 8-9 | 29 (25) |
| | 6-7 | 25 (19) |
| | 4-5 | 16 (17) |
| | 0-3 | 9 (8) |
| | | 45 (36) |
| | | 34 (38) |
| | | 16 (17) |
| | | 5 (8) |
| | | 1 (1) |

Subgroup Analyses:

Year 4

Year 8

Commentary:

Students at both years were fairly successful in determining which graphs provided the best information in a given setting. Moderate growth was seen from year 4 to year 8. There were few differences in performance by gender or ethnicity. Year 4 students showed a slight decline in performance from 2003, while year 8 students showed a slight increase. Pasifika students scored lowest at year 4 but highest at year 8.
