

NEMP Technology Survey, 1996

1. What do you think technology is?

.....

.....

Some people have said that technology is about working out ways to solve problems. To do this you can make something new, find out how things could be made better or work out different ways of doing things. It can also be about using equipment such as tools, machines or computers.

2a. What sort of things does your class do when you are doing technology at school?

.....

.....

2b. What technology does your class do with your regular class teacher - not a specialist teacher?

.....

.....

3. How much do you like doing technology at school?

Why do you say that?

.....

4. How good do you think you are at technology at school?

5. What does a person have to be able to do to be really good at technology?

.....

6. What sort of technology things do you do in your own time - when you are not at school?

.....

.....
